SUMMARY

Software Engineering student who builds live SaaS platforms, full stack web apps, and AI agents. Experienced in connecting modern LLMs using the Model Context Protocol (MCP) and writing backend systems in Java and Python (FastAPI). Looking for a software engineering internship to write clean code, work with cloud deployments, and learn from an experienced development team.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript / TypeScript, SQL, C#, HTML/CSS
- **Frameworks:** Spring Boot, FastAPI, React, Next.js, React Native, Tailwind CSS
- **Cloud & DevOps:** CI/CD Pipelines, Linux/Ubuntu, Docker, DigitalOcean, Hugging Face
- **AI & Data:** Model Context Protocol (MCP), Local LLMs (Mistral, Gemma), Machine Learning
- **Databases:** MySQL, PostgreSQL
- **Hardware & Core:** IoT (ESP32/ESP8266, Arduino), Basic Networking, Git/GitHub

WORK EXPERIENCE

Independent Software Developer [2024 – Present]

- Shipped and maintained live web applications and SaaS platforms, driving 160+ active users and over 1.4K+ logged user interactions across production deployments.
- Engineered backend services and automation pipelines using Python, Node.js, and REST APIs, optimizing asynchronous background task queues for data heavy workloads.

KEY SOFTWARE PROJECTS

Kapruka AI E-Commerce Agent | Next.js, TypeScript, Gemma 4, MCP

- Built a production ready conversational agent integrated with Kapruka's live Model Context Protocol (MCP) to handle real time inventory and live checkouts. Engineered an intent dispatcher to accurately process Sinhala, Singlish, English, and Tanglish inputs before hitting the LLM.

GetQuickSubs.app (SaaS Platform) | Python FastAPI, React, Gemini AI

- Architected and deployed a cloud native subtitle translation web application serving users directly via browser. Wrote custom parsing algorithms to ensure .srt timestamps remained mathematically perfect during translation, and utilized async background workers for heavy AI tasks.

Apex EMS – Enterprise Management System | Java, Spring Boot, Oracle, MongoDB, React

- Built a full stack employee portal using Oracle SQL for HR and payroll records, and MongoDB for fast daily attendance tracking. Developed a role based access system (Admin, HR, Employee) to handle employee onboarding, leave approvals with balance checks, and payslip generation.

EDUCATION

National Institute of Business Management (NIBM)

- **Higher National Diploma in Software Engineering [2025 - PRESENT]**
Current GPA: 3.9+ (Internship required for completion)
- **Diploma in Software Engineering [2024 - 2025]**
Passed with GPA: 3.89 / 4.00

CERTIFICATIONS & LANGUAGES

- **Kapruka Agent Challenge 2026:** Builder Certificate for developing a live AI shopping agent.
- **CYBOTS 2025:** Certificate of Excellence (Special Award) from the NIBM Kandy IT Society.
- **IBS Campus:** Business Management & Marketing (4-month Foundation Level).
- **Languages:** English (Conversational, good reading & writing), Sinhala (Native).
